

Dear FCC administrator,

I am worried that you may cause Air 1 Radio to go off the air.

This station has a very positive impact in our community and gives our students an alternative to some of the crude material on regular radio stations. I think Air 1 should at least have the same rights the other stations have.

I listen to Air 1 online and in my car. Even though I listen to other stations from time to time, it is Air 1 that allows me to listen with no fear that I will hear crude language or inappropriate information. I can safely have this on in the car when my young children are with me.

Please try to see my point. I know that I am a minority and it is sometimes hard for us to get ourselves heard.

Sincerely yours,

Craig Green
